## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-15 are allowed.

2. The following is an examiner's statement of reasons for allowance: A flexible circuit board with a plurality of magnetically sensitive elements, a plurality of resistor elements, and a seal covering the flexible circuit board, sensor elements, and resistor elements wherein the sensor elements and resistors are located on said flexible circuit board to allow bending, in combination with all other limitations of claim 1 is not disclosed nor deemed obvious in view of the prior art of record. The closest prior art is Kaylor et al. (U.S. Patent Number 6,481,278), which has all the needed circuit elements, but does not include a seal or any motivation to include a seal. Like wise, a liquid level sending unit utilizing the same flexible circuit board from claim 1, including all other limitations of claim 7 is not disclosed nor deemed obvious in view of the prior art of record. Finally, a method of installing the novel flexible circuit board is also deemed novel over the prior art since the device is novel, then the method of installing such a device would also be deemed novel over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
